

# SCB Series Electronic Digital Counter

Panel Place :

## ● MAJOR FEATURES

1. Front operation panel is 72 x 144 mm DIN and designed in pursuit of easiness to use and high operational efficiency.
2. Bright LED display and dynamic scanning displaying system are applied to the product design. The 8-digits large counting range series counter is also provided for the demand of user in special application.
3. SCB series provide sensor power source built-in ( DC 12V/50mA) for the various kinds of sensors (photo-electric, proximity and transducer ) to directly connecting with counter.
4. It makes the memory for 2000 hours becomes possible by the 3.6V Ni-cd battery and is avoided to change battery usually.
5. SCB series counter all have Vout & Gate In. function.
6. High stabilized electronic circuits and mechanism against noise are provided.
7. Terminal connection is divided between up and down ,and separated AC power and signal wire . It can avoid the error terminal connection.

## ● Mounting:

(1) Avoid use in the follow places.

- Places where the unit may be splashed with water or oil, or places extremely dusty.
- Places where the unit may be exposed to solvent vapor or corrosive gas.
- Places where the unit is exposed to direct natural light for a long time such as the case of outdoor installation.
- Places where temperature, humidity or impact exceeds the rating level.

(2) Mounting method.

- Cut the mounting panel as shown as follows.
- Mounting panel thickness which is possible to be mounted is 1~8mm.
- Insert the counter into the panel, and fix the Mounting frame from the rear.
